

Integrated Impact Assessment Statement – 23/24 Savings Programme

Community Equipment – Phase 2

As part of the Phase 1 Savings Programme, approved by the EIJB in March 2023, an Integrated Impact Assessment was carried out on proposals to release grip and control savings within the Community Equipment Service. This IIA is available on the Edinburgh health and Social care Partnership website: [IIA-Community-Equipment-Store_final.pdf \(edinburghhsc.scot\)](#)

Since March 2023, further development work has been completed around the Phase 2 proposals and as a result, the opportunity for an additional in-year saving for 23/24 of £80,000 has been identified. This saving will result from better integrated budgetary control and processes between the City of Edinburgh Council and NHS Lothian, with improved financial processes and access to data allowing for greater scrutiny and accountability against budgetary spend.

The IIA completed in March 2023 has been reviewed and is considered to still be relevant. As such, a new IIA is not required at this time.

SRO: Heather Tait, Hospital and Hosted Services Manager

Executive Lead: Mike Massaro-Mallinson, Service Director for Operations
