

## **Integrated Impact Assessment Statement – 23/24 Savings Programme**

### **Continence**

This proposal is a grip and control workstream which will deliver savings through focus on 2 key aspects:

- Reviewing continence supplies to nursing homes, following a test of change which has identified over-prescription.
- Contract management and procurement savings.

This is a normal part of operation management which is anticipated to deliver financial efficiencies. There are no identified impacts on patients or staff. As such, it is considered that an Integrated Impact Assessment will not be required for this proposal.

**SRO: Heather Tait, Hospital and Hosted Services Manager**

**Executive Lead: Mike Massaro-Mallinson, Service Director for Operations**
